U.S. CDC's Zoonotic Disease Prioritization Workshops
The U.S. CDC collaborates with countries and other partners to conduct One Health Zoonotic Disease Prioritization workshops to help countries identify their top five zoonotic diseases of greatest national concern. Prioritizing zoonotic diseases means countries can more efficiently build laboratory capacity, conduct disease surveillance, plan outbreak response and preparedness activities, and create collaborative disease prevention strategies to reduce illness and death in people and animals. https://goo.gl/5fdJYH

Using a One Health Approach to Combat Tick-Borne Diseases
Infections transmitted by ticks are increasingly recognized as important causes of disease in humans and pets in North America. https://goo.gl/ZpM8q7

December 10, 2017 World Veterinary Association (WVA) Declaration of Incheon on the Role of the Veterinary Profession in One Health and EcoHealth Initiative
One outcome of the World Veterinary Congress 2017 in Incheon, Seoul, South Korea is the VETERINARY VISION 2050 Declaration to emphasize the professional and societal roles of veterinarians in One Health networks. On 10th December 2017, the World Veterinary Association (WVA) Council adopted that Declaration as the WVA Declaration of Incheon on the Role of the Veterinary Profession in One Health and EcoHealth Initiatives.
November 5-6, 2017 G7 Health Ministers' Communiqué embraces One Health

At the November, 2017 G7 meeting of Health Ministers in Milan, Italy, several important references were made to One Health - a significant sign that the top 7 industrial nations of the world have embraced the One Health concept and approach. See G7 Health Ministers' Communiqué ©, United towards Global Health: Common Strategies for Common Challenges.

BOOKS

New 2017

Caribbean Resilience and Prosperity Through One Health
Edited by Chris Oura, Adana Mahase-Gibson and Craig Stephen. E-Book published by One Health Caribbean, 2017

"The Caribbean is the world's most tourist-dependent region...The need for an integrated approach is demonstrated by the challenges we face from more frequent and more severe tropical storms and hurricanes, water shortages, rises in sea level, loss of fisheries, increases in mosquito-borne diseases, and chronic illnesses linked to improper nutrition and environmental pollution." https://goo.gl/autK2M

Prepared by C. Stroud and Blair Budd
