Integrating One Health and Conservation

1st International One Health Webinar, November 10, 2014

Dr. Gladys Kalema-Zikusoka
Ashoka Fellow, Whitley Gold Award Winner
Founder and CEO, Conservation Through Public Health
Mountain Gorillas critically endangered, recently increased from 780 to 880
Bwindi Impenetrable National Park

- Limited access to social services
- Poverty, disease, high human population growth
- Critically endangered species and fragile habitat
- Ecotourism is now thriving
- Integrated approach needed to better address these multifaceted problems
Threats: Human/Wildlife Conflict and Disease
Disease Transmission
Conservation Through Public Health
NGO and non profit founded in 2003

- **Mission:** To promote biodiversity conservation by enabling people, wildlife and livestock to coexist through improving their health and livelihoods in and around Africa’s protected areas

- **Vision:** People, wildlife and livestock living in balance, health and harmony with local communities acting as stewards of their environment
CTPH Strategy - Integrated Programs
Wildlife Health/Zoonoses prevention
US Ambassador Steve Browning and wife, Susan visit Gorilla Research Clinic
Shared water sources
(Giardia causing diarrhea)
OKWERINDA
PREVENTION AND CONTROL OF KUTATURIZA
ENDWARA ENGAGI NARI DISEASE TRANSMISSION BETWEEN HUMANS AND GORILLAS ZO KU TUTURIZA
Village Health and Conservation Teams

- **Village Health Teams** - Recognized Ministry of Health (MOH) structure
- **Monthly Data collection for MOH and Uganda Wildlife Authority (UWA)**
- Hygiene and sanitation
- Family planning
- Disease identification and referrals (TB, scabies, HIV/AIDS, diarrhea)
- Nutrition and sustainable agriculture
- Conservation education
- Reporting human and gorilla interaction
Adding Family Planning
CTPH Population, Health and Environment (PHE)
Village Health and Conservation Teams (VHCTs) in Community Based Depoprovera (CBDMPA) program with Family Health International (FHI360)
Sustaining Village Health and Conservation Teams with livestock and Village Savings and Loan Associations (VSLA)
Results – Health and Conservation

- 120 VHCT community Volunteers (Bwindi & Virungas) reaching 44,000 people
- Bwindi and Mgahinga Conservation Trust (BMCT) adopted the VHCT model in their VSLA groups, now reaching an additional 11,000 people
- Increased reporting of human and gorilla interactions
- Increased health monitoring at the human/gorilla/livestock interface (Intestinal helminths, Giardia, Cryptosporidnia, Salmonella)
<table>
<thead>
<tr>
<th>Health Impacts</th>
<th>Conservation Impacts</th>
</tr>
</thead>
<tbody>
<tr>
<td>• 12 fold increase in new family planning users, over 60% women above 28% of national average</td>
<td>• Reduced human and gorilla conflict</td>
</tr>
<tr>
<td>• 50% increase in hand washing facilities, anal cleansing material, clean water storage containers, drying racks</td>
<td>• Reduced disease incidences in the gorillas</td>
</tr>
<tr>
<td>• 11 fold increase in TB suspects referred</td>
<td>• Women and youth more involved in conservation</td>
</tr>
<tr>
<td>• Men more involved in family planning</td>
<td>• Improved conservation attitudes (sustainable agriculture, gorillas protected in community land, reduced poaching and illegal forest off take)</td>
</tr>
</tbody>
</table>
Summary

- Integrating conservation, public health and microfinance can result in sustainable and scalable PHE model
- VHCTs and VSLAs
- GDN 2012 Japanese MIDP Award - scaling up a social service delivery model
Virungas - Mount Tshiabirimu, Democratic Republic of Congo (DRC) gorilla habitat
Building permanent Health and Gorilla Conservation Centre raised $100,000 ($200,000 remaining) (UWA and CTPH partnership)

• THE CENTER
• Will analyse over 2000 samples per year from gorillas, livestock and people who are sick to detect sharing of diseases
• Will annually reach over 50,000 community members; 1000 tourists; and 200 students with health, conservation, ecotourism and livelihoods education and life skills
We need funding to expand our impact

- SCALING THE MODEL
- Village Health and Conservation Teams lifting homes out of poverty
  - In one year with $30,000 will be able to reach 10,000 people in each parish
  - 2,000 homes in each parish will have a better quality of life through improvement of health, livelihoods and their environment
Baby elephant rescued by CTPH Community Volunteers in QENP, at UWEC
Anthrax in QENP strikes again!
National Disease Task Force
(Anthrax, Ebola, Marburg)

• Ministry of Health
• WHO
• UNICEF
• MSF
• KCCA, Kasese District Local Government, Mpigi District Local Government

• World Vision
• Uganda Prisons Services
Community Conservation Animal Health Worker (CAHWs) Volunteers Training (National Disease Taskforce)

July 27, 2010
Pian Upe Wildlife Reserve, Karamoja, Eastern Uganda
Survey of 2000 households from high conflict villages

- 17% want the park to be conserved, and only for cultural reasons
- Boiling milk – 14%
- Pit latrine (toilet) – 8%
- Animal House – 25.5%
- Kitchen – 37%
- Clean water storage – 73%
- Eating game meat – 100%
Promoting One Health and Conservation through Community Animal Health Workers

- Comparative disease surveillance of wildlife and livestock
- Conservation Community Animal Health Workers
- Village Conservation Committees headed by local leaders reporting to the CCAHWS and UWA
- Conservation and Culture

Engagement with Universities

- Participate in research and field training with us and gain academic credit
- Individual research – Undergraduate, Masters, PhD
- Student Groups
- One Health Residency/Rotation – hosting medical and veterinary students working together (later to include social scientists and environmental students)
Hosting University Students

• Medical student from Australia and public health student from University of Cincinnati studying PHE in a forest ecosystem

• Duke University student studying the role of women in conservation
Veterinary Student from Penn State University - Kira Hydock
Students Conference in Conservation Science at Bangalore 2014
Get Involved

• Sign up for monthly e newsletter
• Visit us
• Volunteer with CTPH
• Participate in research and field training with us
• Make a donation (paypal, network for good, website)
• Follow us on facebook and twitter
Acknowledgements
