

**International One Health for One Planet  
Education Initiative (1 HOPE)**

**Agenda  
Organisation Meetings**

**1. Welcome** – Cheryl Stroud) and George Lueddeke

**2. Introductions**

**3. The One Health Commission** – Resources available and under development - Cheryl

Needed collaborations in today's systems will not happen spontaneously but will start with 'relationships'. As groundwork for many joint One Health efforts such as *1 HOPE*, since 2014 the [One Health Commission](#) (OHC-link to home page ) has been working to 'connect' One Health stakeholders to seek synergies and facilitate collaborations across professions.

Activities toward that goal have included hosting - together with the [One Health Initiative](#) (OHI-link to home page):

The [First International Who's Who in One Health webinar](#) on November 11, 2014

The [Second International Who's Who in One Health webinar](#) on November 4, 2016 in celebration of inaugural global One Health Day

Two invitational '[Synergizing One Health Collaborations Online Meetings](#)' on October 17 and 24, 2018.

[One Health Training, Research and Outreach](#) initiatives

[One Health Educational Resources](#)

Online [One Health Opportunities....other](#)

The [One Health Education Task Force](#) (OHETF) - established in 2015 to explore ways to begin integrating One Health into education around the world beginning early (primary, secondary or K-12 students) and beyond.

**4. Purpose of initial 1 HOPE organizational meetings** - George

- Provide a *platform* and *opportunities* for individuals and organizations to get involved in collaborative activities that will further One Health & Well-Being and UN-2030 Sustainable Development Goals education programs around the world.
- Develop further One Health & Well-Being (OHWB) education collaborations among international participants;
- Build global capacity for understanding the OHWB concept to underpin the UN-2030 Sustainable Development Goals (SDGs);
- Expand OHWB Education initiatives beyond primary, secondary, and tertiary levels to include community / civil society, government, and corporate business.

*Interest calls*

Summary of responses – number-individual/organisations, regions\*, countries\* and Individual / group preferences – **Primary, Secondary, Tertiary, Community, Gov't, Business, Multiple** (outstanding profiles!)

*Proposed planning team* – OHC, OHI, WG co-leads, other...

*Composition of WGs (c 10?) membership* – cross regional (Africa [North, West, East, South],

Americas [North, South, Caribbean], Asia, Europe, Middle East, Oceania)

Each group will select its own leadership, set its own priorities/agenda and seek input and advice from the Planning Group and the broader One Health&Well-Being community (national, regional, global)

The One Health Commission will provide the online meeting, communications and survey platforms as needed but each group will provide its own administrative oversight and support.

At least two co-leaders will be needed for each group, one to organize and assure that meetings happen (and run the online meeting system) and one to record meeting notes. Both should be integrally involved in group direction and activities decisions.

We will potentially create an *I HOPE* Facebook page. Suggestions for I HOPE communications are welcome

- It is urged that the following underlying themes be incorporated into all initiatives:
  - Reframing human attitudes toward the human place in the world as part of an ecological continuum;
  - Raising awareness of the UN-2030 SDGs and encouraging their appropriate integration across school/higher education programs or activities;
  - Developing international cooperation (and more mutual understanding);
- Consider proposals to fund pilot One Health for One Planet / SDG project(s).
- Queries/suggestions?

**What's next?**

- Watch for next steps sign-up sheets to form groups – early Sept 2019!
