

Dr. Janine Seetahal is a public health trained veterinarian from Trinidad and Tobago with a strong interest in zoonotic disease prevention and control. Her primary research interests are bats and their viruses and she strives to promote bat conservation through research and evidence-based public education. She earned her Doctor of Veterinary Medicine (D.V.M.) and Master of Public Health (M.P.H.) degrees from the University of the West Indies, and is currently pursuing her PhD in Molecular Genetics at the same institution. Her present research mainly focuses on the role of mainland-island bat movement in the transmission of rabies and other bat-associated viruses in Trinidad. She also coordinates a Rabies Subgroup under the Veterinary Public Health Working Group of the Caribbean Animal Health Network (CaribVET), which aims to improve the prevention and control of rabies within the Caribbean, and is one of the Directors for the bat conservation group Trinidad and Tobago Bat Conservation and Research Unit (Trinibats).
